Record low mortgage rates and declining inventory helped market conditions move faster. Both the condo and single family market continued to see significant year over year sales growth and large gains in the price trend indicators. Condo sales surged 36.2% year over year to 952, the highest total in five years, while listing inventory slipped 3.5% to 5,490 from the same year-ago period. All price trend indicators rose annually, with median sales price reaching a new record. Single family price trend indicators all rose annually to new records. The median sales price surged 50.4% to a new record of

\$1,955,000, respectively, from the prior-year quarter. These price gains were aided by the 6.3% rise in average sales size to 3,586 square feet over the same period. With an overall gain in sales for both property types and a decline in listing inventory, the market's pace accelerated. Months of supply, a measure of the number of months to sell all inventory at the current sales rate, was 15.4 months or 38.4% faster than the same period last year. Market-wide, the market share of sales to close above the last asking price was 3.2%, up nominally from 3% in the prior-year quarter.
